SHELL REVIEW

WOOD RIVER REFINERY

The better part of
one's life consists of
his friendships.

Vol. 4.

August 7, 1940.

Number 11

Picnic Committee Promises Great Event This Year!

Left to right: Geo. Bruce, J. E. Kennedy, Wm. Redd, J. G. Cuddy, W. E. McAnany, H. D. Chappell, general chairman; O. A. Kleinert, C. J. Wilson.

According to the Picnic Committee, the Service Club picnic for all Shell employees and their families will be one of the finest held thus far. The picnic, which will be held at Rock Springs Park, Saturday, August 17th, will start off at daybreak with a golf tournament and wind up at midnight with a dance.

Cards have been distributed to all employees. Those who have children should return these cards to the Industrial Relations Department in order that their children will receive free tickets for the rides and refreshments.

A schedule of the program for the day is as follows:

Golf Tournament: Tee off, 6:30 a. m. to 9:30 a. m.

Children's Rides, 9:00 a. m. to 12 Midnight:— Merry-go-round, Ferris Wheel, Kiddie Car rides, Miniature Train ride.

Children's Races: 10:00 a. m., Children 6 and 7 years; 10:30 a. m., Children 8 and 9 years; 11:00 a. m., Children 8 to 12 years (novelty); 11:30 a. m., Children 10 and 11 years; 12:00 Noon, Children 12 to 16 years.

Adult Contests: 1:00 p. m., Men—Egg throwing and Dizzy Izzy relay; Women—newspaper and match box relay.

Professional Entertainment: 2:00 p. m., and 7:00 p. m.

Soft Ball Game: 3:00 p. m. Shell Industrial League Team (Rudy Perich, manager) vs. Shell Refinery All-Stars (Carl Davidson, manager).

Dancing: 2:30 to 4:00 p. m., McCallister's Hill-Billy Band; 9:00 p. m., to 12 Midnight, Al Rezakab and His Orchestra.

Added Attractions! "Bill" Hoppe and his clownish antics; "Scottie" Scobbie, weight lifter and muscle control artist.

Picnic sponsored by the Shell Service Club.

Did You Know . . .

That drilling sites of 1,663 out of slightly more than two thousand wildcat wells drilled in the United States in 1939 were selected on the basis of modern scientific methods? Two hundred seventeen of the 1,663, or 13 per cent, were completed as successful wells.

That more than three-fourths of the 288 large producing oil fields in the United States were found through the use of scientific exploration—surface or sub-surface geology, core drilling or geophysics? Surface geology alone is credited with the discovery of 116 out of the 288 fields.

That the greatest consumption of gasoline last year took place in the month of August, the same as in 1938? The daily average consumption in the United States during August, 1939, was 70,514,000 gallons.

New Policy for Military Leaves

Mr. Alexander Fraser, president of the Shell Oil Co., has announced a liberalization of the company's military leave policy, to be as follows:

"The following policy with respect to military leaves shall apply to employees, both staff and operating, who have completed at least one year of continuous service with the Company.

I. Leaves of Absence for Training With Military, Naval or Marine Organizations (excluding active duty)

"Employees will be given a leave of absence for such training for a period not exceeding one month which shall be in addition to their regular vacations. Staff employees will be paid their normal salaries, and operating employees will be paid their normal wages during this period of training without deduction for any remuneration received from Federal or State authorities. In the case of hourly paid operating employees, the amount of wages will be arrived at by taking an average over the preceding twelve months.

"The extent of leave of absence provided for in the foregoing is designed to meet the existing training requirements of the various organizations enumerated above. If the situation changes, the matter will be reconsidered in the light of the new conditions.

"Employees' participation in the

Provident Fund, Pension Plan, Group Life and Group Income Protection Insurance Plans will be continued. The Disability Benefit Plan, applicable only to operating employees, necessarily will be suspended.

II. Voluntary Service in Regular Armed Forces.

"If an employee enlists in one of the regular armed forces in the United States prior to a declaration of war, his service with the Company will be treated as terminated. He will, however, be eligible for pay in lieu of vacation. The Management will record on all such employees' personnel records the circumstances attending their termination and they will be given special consideration in the event of their later applying for re-employment.

"As regards Group Benefit plans, the Group Life Insurance will, as provided for in the Insurance Contracts, be extended for three months provided the leaving employee pays his part of the contribution; the remainder will be cancelled. Membership in the Provident Fund can be cancelled or suspended at the employee's option.

III. Leaves of Absence Specially Requested by Governmental Authorities.

"It is possible that the government may request the services of specially qualified employees. No definite policy is for the moment suggested with regard to such cases and all such inquiries should be referred to the Management for individual consideration.

Shell Club Dinner Party Friday

Friday night, August 9th, the annual Shell Club Dinner Dance will be held at the Meadowbrook Country Club on their cool-open-air terrace. Music will be furnished by Shep Fields and his famous ripplin' rhythm orchestra.

Dinners will be served up to 9:00 o'clock at \$1.50 per person; choice of chicken, steak, or frog legs. No cover charge or "corkage" fee for the dinner guests.

Reservations will be accepted at the Industrial Relations Department up to noon, Thursday.

Queen Wilhelmina Fund Grows!

Mr. Roberts is in receipt of a letter from Mr. F. A. C. Guepin, executive vice-president of the Shell Oil Co., Inc., expressing his appreciation of the very generous response by the refinery employees to the appeal for financial aid to relieve the war sufferers, by contributing a total of \$530.05.

"While the foregoing is announced as a statement of Company policy, the Company necessarily must reserve the right to change such policy in the light of changing conditions."

LOYALTY

Now is the time when we, as American citizens are beginning to realize the advantages of being a member of a great democracy where we can express ourselves freely, even to the standpoint of criticizing those in power without danger of being thrown into a concentration camp.

We begin to realize that loyalty to the country is not a paraphrase but is a vital and necessary thing for the existence of a democracy. Party strife, internal dissension, and bickerings should be forgotten. Everyone should unite in one great effort to continue the existence of this democracy.

THE GRAPEVINE

Andy Heavner has been summoned for summer military duty. In order to get used to the military discipline he has been practicing with Velmar Kelly in this manner: "Yes-sir; no-sir; thank you, sir!" until Velmar has begun to feel like a brigadier general.

Bud Chappell was taking his boy out for a walk the other evening and on their route they passed Frank Schinagle's house, where three pairs of Frank's trousers were hanging on the line. Bud's little boy looked up at him and said: "Daddy, let's go over and play in Mr. Schinagle's tents!"

L. E. Purdy abandoned the ranks of bachelorhood recently when he pledged his vows with Miss Lola Baumgartner.

Charlie Bockholdt has a happy smile on his face now. Reason — a baby girl on July 27th.

All of the Copenhagen snuffers in the plant are celebrating the fact that Herbie Miller, of the D. & D. plant, has decided to quit chewing the vile old stuff and will appreciate everyone's co-operation in refraining from chewing it in his presence or offering it to him.

The new conscription bill has most of the young bachelors in the refinery very much worried. This is a swell chance for all youse gals to hook a man before he has a chance to figure out whether it would be worse to be shot or to get married.

OLD TIMER

H. D. CHAPPELL

"Bud," as he is known throughout the plant, started to work for Shell just twenty years ago in the Labor Department. On May 1, 1922, he was transferred to the Cooling Water System, and November 1, 1929, he was transferred to the Car Department as Assistant Car Foreman. In 1931 he was promoted to Car Foreman.

"Bud" can well lay claim to the distinction of being one of the best-known and liked employees in this refinery. As Past President of the Shell Club, Chairman of the last three Service Club picnics and Christmas parties, he has been very active in promoting employee activities.

Outside of his plant activity "Bud" is a home-lover of the first degree. He says that he has appreciated the time he has spent with the Company and hopes that his future service may be as long as his part service.

There was an old maid that insisted that her mama cat never leave the house at nights. Last winter she took a Southern cruise and wrote home: "I'm having more darn fun . . . met a swell gentleman on the boat . . . P. S.: Let the cat out to-night."

Boiler House News

J. E. BREWER.

Peck is recovering from a lacerated hand which came in contact with a saw.

Emil Cotner is back on the job, feeling much better.

Fay Yeck is sporting a new red Oldsmobile. We understand he is expecting to become fire chief of Bethalto.

What 6-legged animal flourishes on Copenhagen? For further information, we refer you to Charlie Chapman.

Lee Hubbard has a good dog to give away. Martin has been trying to figure out why anyone should want to get rid of a good dog.

OLD TIMER

J. E. LONG

"Gene" started to work one hot day in August, 1920, as a sample boy at the Lab.

He was a member of one of the first baseball teams that Shell entered in the Industrial League.

"Gene" spent some time in the Experimental Lab, then was transferred to St. Louis in 1923. He returned to Wood River as Assistant Compound House Foreman when it was built in 1924. He became Foreman in 1931.

He has been a charter member of all the social and recreational organizations started at this refinery since he started with Shell. His cheerful smile has won a large number of friends for him at this refinery.

"Gene" leads a very active life—bowling during the winter—golf during the summer—and poker in any kind of weather. His most active interest, however, is in his home life. His children, a boy and a girl attending school, are his chief interests in life.

He says that Shell has been a great company to work for and hopes to see many more years of service.

Wedding Guest: "This is your fourth daughter to get married, isn't it?"

Mac Tight—"Aye, and our confetti's getting awful gritty".

D. & D. Plant

E. SCOTT.

It is rumored that Mr. Stokes has been calling his lady friends so many times that the said Mr. Stokes is practically paying the dividends of the telephone company.

Messrs. Brown, Burger, Fletcher and Warniski, who had been fishing lately in Minnesota, report that it was so cold that the fish were wearing overcoats. Also, one fish said to the other that there were four fishermen wearing overcoats, too.

Benny Hinman said two could live as cheaply as one — according to the "Believe it or not" column!

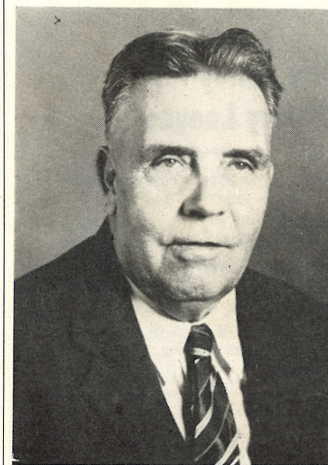

Joe Brien says that what he likes about Bunny Miller is that he is so punctual in making out the next week's golf match list.

Mr. Owsley just can't figure out why fuel oil and lube oil wouldn't make an ideal motor oil.

We all welcome Mr. Chartland back to the D. & D. Plant.

The boys at the D. & D. who BUY Copenhagen appreciated it very much when Bunny Miller stated that he had stopped using same.

OLD TIMER

E. P. CLAYTOR

"Ed" started to work in the Topping Department in July, 1920. After working in several operating departments, he wound up in the Dispatching Department where he is employed as Pumper Special.

"Ed" claims that his work in the plant is his only hobby. He likes to pick out a good book and settle down to read after he gets home from work.

He has six children; however, they all have homes of their own now except one who is still living with "Ed".

"Ed" claims that the plant has been a wonderful place in which to work, as he has always been treated fine and has enjoyed the many close friendships he has made here.

Pipefitters Hold Annual Picnic

Pipe Pips

DICK ROBERTS.

The pipefitters held their annual frolic at the Edwardsville Legion Park, Saturday, July 20. Of course, none of the boys were hungry or thirsty. They only consumed 16 barrels of tea and 325 lbs. of fish.

"Arky" Rodgers retained his title as champion "tea taster". "Cutie" Cooke excelled in bridge, "Heavy" Henderson was golf champ, Jack Dunn in badminton, and "Chubby" Warford in dominoes (galloping). "Maude" Monkel took care of the curb service, answering no calls, of course, except his own Chevy coupe. Everyone had a tip top time.

Bill Bell thinks squirrel is a very costly delicacy, due to the fact that he paid \$25.50 for one, recently.

Bill O'Hare wants to know if there were any good football plays made in "The Hunchback of Notre Dame."

In a recent telephone conversation between Buck Lawrence at North Property, and "Brains" Harper in the plant pipe shop, the following was heard:

Buck: "Harper, I just don't know how this job goes in over here."

Harper: "Just a minute, Buck, and I'll draw a picture for you. (Pause). Oh, shucks, Buck, I can't draw a picture over the phone!" (Use your imagination as to what followed).

"Snuffy" Shriner returned recently from Hollywood, Calif. While there he made several screen tests. Good luck, "Snuffy".

Opportunities

FOR RENT—Room, with board, for gentleman. 109 W. 5th Street, Roxana.

FOR RENT—4 rooms, with board. 161 S. Central Ave., Wood River.

FOR RENT—3 rooms, modern, private garage. 659 Lorena Avenue, Wood River.

ROOM AND BOARD—537 Ferguson Avenue, Wood River.

Inspection Lab. News

B. W. DeLONG.

Considerable criticism has been voiced because no Lab. News has been appearing in the last few issues. The trouble is that all the scandal has been withheld from the reporter.

Among recent marriages we have those of Legate and Bivens. Legate got married so he could learn to play tennis, his wife being quite adept. Bivens married a photographer's daughter. Congratulations!

A cork ball league has been formed in the lab. Although the season has just started it appears that the powerful sluggers of Rip Collins are going to prove too tough for the hitless wonders of Pat Maguire. Latest standings show four victories for Collins' team and two for Maguire's.

The arrival of a son occasioned the passing of cigars and the collecting of bets by Stan Monks.

The greatest event ever sponsored by a Lab. organization was the Lab. picnic last year. Plans are now being made to make this year's picnic equal to last year's. Enthusiasm is running high and we hope to announce the date in a few days so that plans may be made by all Lab. members of the Recreation Association to attend.

The annual Lab. Golf Tournament is starting its first round, and players may be seen daily out at the course practicing up to walk away with the trophy. Jess Ford won last year's trophy but the rest of the golfers say that they will make it plenty tough for him to repeat.

The Lab. softball team wants it known that they do not like to win their games on forfeits. They won't promise to lose to get some opposition, but they would like to have a little fun playing.

FOR SALE—4 room bungalow, modern. 108 8th Street, Wood River, Phone WR867.

Research News

C. O. FARNSTROM.

On Saturday, July 27, members of the Research Laboratories got together to give Mr. Love, who is being transferred to New York, a farewell party.

The party was held on the "Good Ship Zasu" and the entertainment was quite "the stuff," although aided and abetted by a rather wide and varied assortment of refreshments. Some played cards, some just chatted, and relaxed in the cool surroundings, and one group "aft" sang (?). A distinguished member of the Senior Staff, whose name we won't include, finding that the "A" string on the instrument he had brought along was broken, gave a terpsichorean demonstration in place of the anticipated cello solo.

The alleged singers tuned up on "The Sidewalks of New York," rallied the rest of the group together and proceeded to "give their all" in singing it to Mr. Love. This acted as an unrehearsed introduction to the presentation by Dr. Edlund, on behalf of the Senior Staff, of a very handsome brief case.

The modest guest of honor manifested his surprise and thanked "the boys".

Much as we dislike losing as fine a man and research chemist, we join in sincere best wishes for Mr. Love's success in his new position of Coordinator of Research.

"Doc" and Mrs. Steve Dorman welcomed a son, David, who arrived Sunday morning, July 21, weighing six pounds six ounces.

Mr. and Mrs. Don Brenz, a daughter, Margaret Ann, six pounds, nine ounce, July 15.

We welcome a new member to our staff, Dr. H. D. Burnham.

Our road-tester Paley Has been sorta wall-eyed lately; The reason he's so washy Is: Mrs. Bujnak calls him "Wacky". When Franklin gets hot He heads for the spot, To get the lemonade Mrs. Bujnak has made. For the rest of this rhyme, See this column next time - - (Or maybe you won't want to).

New Employees

The employees of this refinery welcome the following new employees to their midst:

Engineering Field: K. I. Harpole, P. P. Walter, Joseph Paur, Jr., V. D. Brown, L. E. Miler, J. L. Korsog, V. Ferguson, B. F. Harper, H. E. Story.

Cracking Cleanout: J. W. Bridgeman, J. D. Konroy.

Control Laboratory: L. R. Starkey, T. H. Jones, W. H. Lamkin.

Cracking V. P.: G. A. Borman, W. H. Foster, W. V. Colbert.

Loading Racks: J. H. Plant.

Treating Light Oil: C. V. Fisher.

Main Office: Miss Nina Harris, E. E. Boeker.

Staff Changes

Paul Stewart has been transferred from East Chicago Refinery to Wood River as Assistant Head Cracking Stillman.

Al Donahue arrived at Wood River from the St. Louis Office. He is in charge of the Dispatching Department.

Rolla Hord just arrived from the Houston Area Office to serve as Assistant Industrial Relations Manager, replacing Al Vineyard, who is being transferred to the New York Office.

"Deac" Lucas will be leaving Wood River shortly. He will assume new duties in the New York Office.

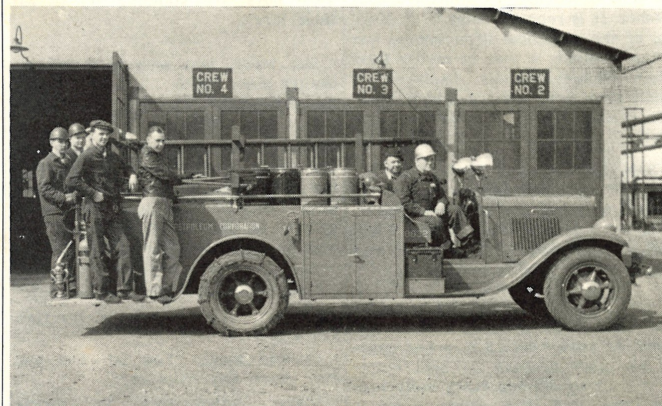

John P. Craig, A. H. Scheu, G. F. Hof, Jr., Miss R. A. Smith were transferred from the St. Louis Office to the Main Office of this refinery.

L. A. Wendt, D. P. Brenz, J. M. Wilson, Jr., R. D. Campbell and E. Dunning have been transferred from Head Office Manufacturing to work in the new Research Laboratory.

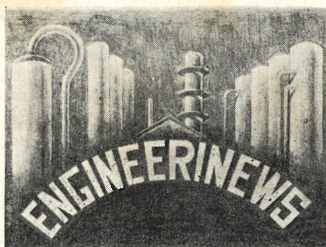

Dr. C. R. P. Retalliau has left the service of the company for other work. He has expressed a desire through the Shell Review to wish his many friends the best of luck and happiness for the future.

Our blonde bundle of personality is sporting a gladiola corsage which did not come from her fiancé, Lyle. When an inquiry was made, she smiled demurely and said it "was a gift from one of the staff."

Ready and Rarin' To Go!

Members of one of Wood River's efficient fire crews ready for a practice run. Included in the group are: J. Cuddy, zone captain; B. H. Gross, J. Ashlock, H. Juhlin, R. Bivens, P. V. Daniels and O. Albrecht.

Field machinist Melvin Keilback, who journeyed to the New York World's Fair during his vacation, is open for bids from prospective Packard owners. Keilback avers that tourist rates were automatically adjusted from two dollars to five dollars wherever he stopped enroute to and from New York, due to his prosperous appearance as he alighted from his Packard.

An original reason for staying home during one's vacation is given by Jack Eilenberger, who said he stayed home to recuperate from last year's vacation.

Orland G. Forcade, of the drafting room, is greatly enthused over his recent improvement in golf. Orland has developed his eye to the point where he finds several lost balls every time he plays. Paradoxically, the situation is a little disheartening because Orland has had to discard several "water hole" balls to make room in his bag for the good ones he found.

Last week the Inspection Department and Field Safety Office moved into spankin' new offices in the Old Dewax Building. As a result of making the new offices, Harry Hocking-homer's Lube Zone Office has been moved to the east side of the same building. We want to caution Harry and the field safety men that any pounding on the walls will just be Jack Vasey's boys doing a bit of indoor hammer-testing.

Our jolly war commentator, E. B. McCormick, after many, many weeks of effort, has succeeded in acquiring substantial adornment on his upper lip. Do you suppose he wants to show the British what could be done? Could be!

With the advent of the Machine Age, pitching wheat is becoming a lost art. However, we have in J. W. Nickell, electrician, a champion wheat pitcher. It is reported that D. J. Konko, of the electrical department, lost a bet involving a case of amber fluid when Nickell proudly displayed a small blue felt pennant which read: "Champion Wheat Pitcher of the World." Nickell's name was attached.

This hot weather makes us envious of Bob Cunningham, who is headed for Alaska to seek his fortune. Bob, who has worked in the Field Office since 1936, terminated his service with the Company July 31.

Walt Scoggins is looking for a couple of handfuls of rusty nails. Last week, he read where a man had caused his apple orchard to bear abundant fruit by driving rusty nails into the trees, and Walt wants to try it on his own apple trees. If you have trouble, Walt, may we suggest spinach?

Car Shop Hot Box

L. A. BROWN.

The interior of the Car Department Office has been brightened up with a new coat of paint and there is some discussion going around whether it was arranged or a coincidence that Fred Isaminger managed to be absent on his vacation at the time the work was going on.

Are you gauded? Does your back hurt? If so, see "Doc" Cunningham, who claims that your worries are over if you will carry a little piece of ragweed in your pocket, and not necessarily your hip pocket at that! Sam Morehead is such a firm believer in the cure that he is taking a supply from Wood River with him when he embarks on his vacation to Minnesota.

Further vacation notes: Fred Noblitt has returned from a trip in the wild and woolly West, spending part of his time in and around Cheyenne, Wyo. Ben Bond returned to the scene of his old stamping grounds at Arkansas City to enjoy the cool (?) breezes of that locality. Cleto Henry is back, much refreshed after vacationing in Wisconsin.

Bud Chappell, "the picnic man," is quite busy these days with the merry-go-round people, etc., in preparation for the Shell picnic. He says that he plans to spend his vacation next year traveling with a carnival.

Warehouse News

MARGARET TATE.

Our Mr. Hoover returned from his vacation to make the recent inspection tour of the plant, while Sparks, Pickett and Brunning sacrificed their Saturday. Wonder if this was because they like the place or because their wives were insistent!

Dula Heuer recently departed for the North Woods to do a little fishing.

June Overstreet returned with a heavy heart from New York City. It seems Edwardsville is just another town now, New York having taken first place in the young lady's heart.

It is rumored that the Material Yard boys are standing up to eat their lunch.

Ben Moore was seen in that same beauty shop again — but no shampoo this time — purely pleasure.

Those frequent jaunts to Oklahoma really meant something to Ed Huebner after all. Miss Mary Elizabeth Loar, of Okmulgee, said "yes" on one of the recent trips and will become Mrs. Huebner in the fall.

Colored Maid: "You is married?" Visitor: "No, I am not married, I'm a maiden lady."

Colored Maid: "You is! Did you ever have any children?"

Visitor, indignantly: "Of course not!"

Colored Maid: "Law sake! Ain't you the lucky thing?"

EMPLOYEES' RECREATION ASSOCIATION

Badminton Tournament Postponed

Due To The Hot Weather

Due to the excessively hot weather recently, the badminton tournament which was scheduled to start July 27th, has been postponed until more favorable weather permits.

Entries will still be taken at the Industrial Relations Department, however, and an announcement of the starting date will be made later on.

Lab Leads in Softball "Champ" League; Research High in "Not So Good" League

The Laboratory team is far in the lead in the Championship League by a three-win margin. Running second is the Lube team. In the Not So Good League, the Research team is ahead of the Service team by one game. This week's play may bring an upset in the team standings.

Bowling Notice

At a Bowling Association meeting held July 23, 1940, the representatives of the various Shell bowling teams voted to have two bowling leagues again this year.

One league will be made up of the higher average teams, and the other league of the lower average teams.

It was again decided to bowl all games at 7:15 p. m., on Friday nights at the Alton Acme Alleys, with the usual \$5.00 per team entry fee.

As we go to press, 27 teams have already indicated their desire to enter, with several teams now being formed which will probably bring the total to 30 teams.

Lube Vacuum News

O. J. McNEILLY

A number of the gang are getting thrills and spills on Ray Gilworth's surf board, and the rest of the fellows are awaiting the chance for a "move up". The grapevine reports that Ira Miller, who razzes the boys from the dock, is due for a surprise the next time he shows up.

Operators of the asphalt plant are not afraid of any "hereafter," as their pump house is surrounded by hot asphalt storage tanks and, as they state, "it's hotter than 'ell".

Quoting Priscilla Lane in a recent movie column: "Most men, when they date a girl, like to do what she wants to do!"

Ted Madosh says "tain't the way he heard it!"

See you at the picnic?

IN MEMORIAM

To the survivors of Edwin Frank Freese, who passed away on August 1st, the employees of this refinery wish to express their deep sympathy in their bereavement.

Mr. Freese had been well known and respected by his many friends in the refinery during his 17 years of service up to the time of his retirement on June 1st of this year. He was thoughtful enough to provide for his loved ones by choosing the proportionate pension which will provide benefits to his widow for the rest of her life.

* * *

To Jesse C. Haley, who was the victim of a lightning bolt on August 4th.

Mr. Haley had been employed at this refinery since 1923. He had acquired a host of friends during his service at the refinery who are deeply grieved at his sudden decease.

He had provided for his family, however, as he had \$4500.00 of life insurance in the Employees Group Insurance Plan.

* * *

To Thomas Pindro, who was fatally injured in the refinery on August 5th. Although he had been in the employ of the company for less than two years, his likeable disposition had made him very popular with his fellow workers.

He had provided for his family, however, by a \$2500.00 life insurance policy in the Employees Group Insurance Plan.

Association?

SHELL REVIEW

WOOD RIVER REFINERY

In America a man has
freedom of speech —
except in his own home.

Vol. 4.

August 28, 1940.

Number 12

— FIVE THOUSAND ATTEND ANNUAL SHELL PICNIC —

(1) "Chris" Meehan, in a genial mood, poses for the photographer; (2) The Ferris wheel received a big play all day; (3) Bill Hoppe gave his usual good performance of magic and fun. Rudy Percich took his family over to see Bill perform. Rudy has quite a large family, or does he? (4) Ray Sanders proudly exhibits the Sanders triplets; (5) A big attraction for the kiddies was the miniature train. "Bud" Chappell tried to crawl under it to see what made it go, but didn't have much luck. (6) "Pappy" Schreier's boy. Just a chip off the old block. (7) Our Vice-President, Mr. Cumming, caught watching the "crowd" walk by. (8) Al. Bayer and Harold Helvie take time out from the serving stand to "look pretty". (9) The families of R. H. Fulton and LaVerne Marsh taking a light lunch. (10) "Goldilocks" Dustman in the bear's pit. (11) Roscoe Hoover in his post of honor at the popcorn stand. Roscoe says that he never ate so much popcorn in his life. (12) Ross Sherwood keeping a watchful eye on "Fat" Thomas at the Bingo stand.

In spite of the terrific downpour of rain during the afternoon of Saturday, August 17, the annual Shell Picnic, sponsored by the Shell Service Club, was a huge success.

The early morning golfers started festivities at 6 a. m., with a golf tournament in which 45 employees participated.

The merry-go-round, Ferris wheel, train rides and ponies were kept busy all day, with lines of children awaiting their turn for rides.

The soft ball game between the Refinery All Stars and the Shell Industrial League team was rained out after two scoreless innings.

During the afternoon (before the deluge of rain) and again in the evening, the crowd was entertained by several acts of professional vaudeville. Our own "Scotty" Scobbie gave a very good demonstration in weight-lifting.

McCallister and his string band played hill-billy music in the dance pavilion during the afternoon. Old-time dancing was the vogue.

In the evening, Al Rezaczek and his orchestra entertained a large crowd of Shellites with dance music until midnight.

Hi-Lites of the Picnic.

At the close of the day the various booths disclosed the following had been consumed: 7000 bottles of soda, 6000 ice cream cones, 4200 weiners, 275 pounds of beef barbecue, 8000 sandwiches, 400 bags of popcorn, 1000 candy bars, 3½ tons of ice used in the food stands.

The food stand measured 16x160 feet, the bingo stand 16x120 feet. E. F. (Fat) Thomas and his wife directed the bingo stand, where countless numbers of games were played. Claude A. Maguire was on the grounds all day with his ambulance. "Butch" Dustman, in the bear cage (cashier's booth); "Doc" Riggs directed traffic in the rain; "Bill" Hoppe was on hand entertaining the children with clownish antics. Bill gave out 3,000 balloons and other trinkets to the children.

The First Aid tent and the public address system used in the bingo stand were furnished by C. N. Streeper and Son. The cooking was done with Shellane gas on stoves furnished by the Werts Bottled Gas and Appliance Co. The Alton Refrigeration Co. furnished two electric refrigerators which were used in the food stands.

Hoover demonstrated his usual ability in handling popcorn sales.

Over 18,000 free tickets were given to the children before the picnic.

Another successful picnic is over, and to "Bud" Chappell, the Picnic Committee, and some 300 employees who took part in the handling of the picnic, we offer our thanks for giving us a day not to be easily forgotten.

Prize Winners.

BOYS' RACES.

Boys 6 and 7 years, 25 yard dash—1, Walter Stork; 2, Donald Bertier; 3, Jackie Allen.

Boys, 8 and 9 years, 35 yard dash—1, Robert Wolf; 2, Robert Dale; 3, Clinton Pierson.

Boys, 10 and 11 years, 50 yard dash—1, Richard Wilson; 2, Ken Adams; 3, Ray McNeilly.

Boys, 8 to 12 years, 3-legged race—1, William Dively and Joe Wilson; 2, LaVerne McCoy and George Rambo.

Boys, 12 to 16 years, 75 yard dash—1, James Mellor; 2, Charles Mellor; 3, Wayne Cox.

GIRLS' RACES.

Girls, 6 and 7 years, 25-yard dash—1, Marine Meyer; 2, Ruth Allen; 3, Anna Lee.

Girls, 8 and 9 years, 35 yard dash—1, Mary Miller; 2, Dorothy Hesi; 3, Patty Meyer.

Girls, 10 and 11 years, 50 yard dash — 1, Katherine Young; 2, Billy Jean Hamilton; 3, Eunice Keilback.

Girls, 8 to 12, Siamese Twin Race—1, Marjorie McGraw and Marie Miller; 2, Mary Pace and Emma Jean Fretz.

Girls, 12 to 16, 75-yard dash—1, Rose Hayes; 2, Florence Hesi; 3, Ruth Mabb.

The feature contest for the adults was the egg-throwing contest, won by Walter Stark and Clarence Priest.

The horseshoe pitching contest was won by Carl Davidson in the singles. G. McConnell and John Laster won in the doubles.

OPPORTUNITIES

FOR SALE—1936 Ford deluxe coupe, equipped with radio, heater, and white sidewall tires. A bargain. Shell Credit Union, 2 W. Ferguson Ave., Wood River.

FOR SALE — 1939 Master deluxe Chevrolet tudor sedan. Excellent condition. J. R. Ferguson, 536 Third Street, Wood River.

FOR SALE—1940 Packard Town Sedan, equipped with radio, heater, and seat covers. Excellent condition. Can be financed at reasonable terms. Melvin C. Keilbach, 346 E. Penning, Wood River.

FOR RENT—New 5 room house, all modern, \$35 per month. Inquire 502 Hillsboro Ave., Edwardsville.

FOR RENT—3 room modern apartment. 1302 Main St., Alton.

FOR RENT—6 room furnished house, \$45 per month. 475 Tipton, Wood River.

FOR SALE or RENT—10 room brick rooming house, and new 4 room modern home, 2 blocks north of Court House, Edwardsville. 511 Second St., Edwardsville.

FOR SALE—1940 Dodge Tudor, good deal. 221 Whitelaw, Wood River.

DID YOU KNOW - -

That Shell Touring Service distributed 14,000,000 maps to America's tourists last year? This is one map for every second car in the United States.

That the average Shell employee is 34 years, 6 months and 3 weeks old; has been in Shell's employ for 7 years and 4 months; is married, and has 2 dependents?

Of all Shell employees, 60 per cent have worked for Shell more than 5 years, and 35 per cent have worked for Shell more than 10 years?

NEW EMPLOYEES

The employees of this refinery welcome the following new employees to their midst:

Control Laboratory: M. E. Jacobsen.

Cracking (V. P.): L. J. LaPelle, M. J. Mygatt, J. M. Pile

Loading Racks: E. E. Ernst, A. W. Scribner.

Topping: A. F. Roberts, G. P. Kerr.

Main Office: Miss Dorothy L. Ebert.

Transferred from St. Louis: Miss Frances G. Nordman, Main Office; C. L. Raymond, Technological; R. D. Fleischig and D. D. Brewer, Main Office.

Visitors Parking Lot Overcrowded

For the convenience of the wives of employees who drive to the refinery at quitting time to provide transportation for their husbands from the refinery, the Visitors' Parking Lot was provided, which is located east of the Shell Service Station near the Refinery entrance. However, many employees are parking their cars in this Visitors' Parking Lot while at work, instead of leaving them in one of the three Employees' Parking Lots provided for their use.

In doing this, the Visitors' Parking Lot is parked full with the result that employees' wives cannot use this parking lot as intended, with the result that the only place left for them to wait is along the side of the highway, which is hazardous and is prohibited by the State Police.

In the interest of your fellow workers and their families, it is requested that you do not leave your car in the Visitors' Parking Lot while at work but instead, park it in the Employees' Parking Lot assigned for your specific use.

LUBE D. & D.

E. SCOTT

On good authority, we have it that Bill King has been in the "dog house" for such a long stretch that the officials have asked him to take out a dog license.

A certain guy was enjoying himself in the lake at Hillsboro when he was distracted by the cries of a fair damsel in distress. So—the guy gets in gear and plowed up the lake to her aid. Fair damsel was ready and waiting for him and as he came within her reach she promptly got the latest improved type of strangle hold on him and started for the bottom once more. Said guy, being sort of caught unaware, and with his mouth open too, arrived at the bottom of the lake wondering just who was drowning here. After a tussle with the lady octopus, or victim, he struggled free and decided some air was what he was needing. Before departing for the surface, however, our hero gave the lady a shove upwards from a decidedly posterior angle and then clawed his own way up.

On his arrival in the land of sunshine, he took such a deep breath that storm warnings were immediately posted by weather observers all along the coast. The old timers predicted it might be the worst blow since '97. That boy needed air!

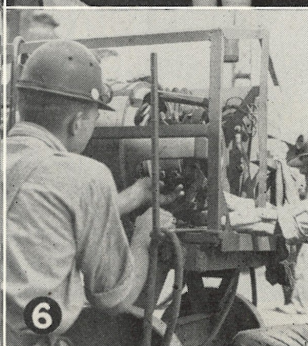

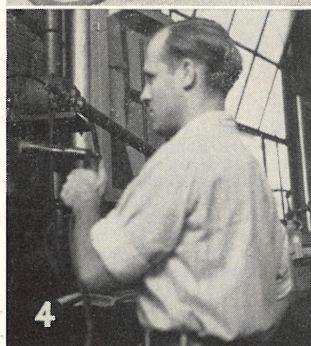

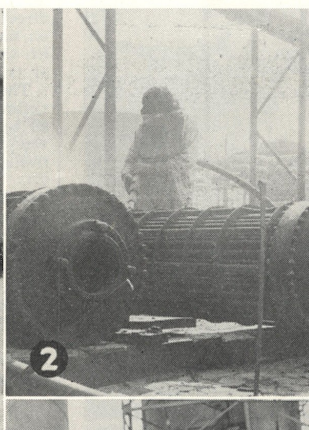

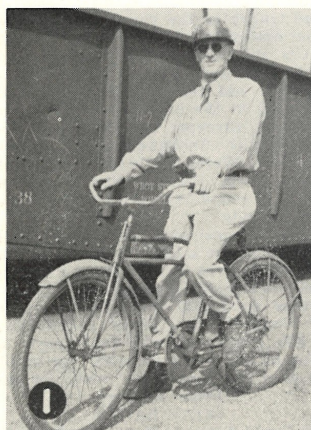

The lady was finally landed with the help of six others, and our hero headed for the bosom of his family, who held box seats on the beach during the entire performance. The family's only comment was: "What were you doing down there that took you so long?"

For further particulars you might inquire in the compressor room at the D & D Plant.

Author—Mad Russian' Radecke.
Hero—Mr. Settles.

It is easy to believe a thing is wrong if your pet enemy thinks that it is right.

INTERESTING SNAPSHOTS

1. Art Higgins, Labor Foreman, astride his "rusty steed."
2. Louie Drainer does a little fancy sandblasting on some tube bundles. Note the cloud of sandy dust.
3. Bob Fulton's pride and joy eye the photographer somewhat dubiously at the Shell Picnic. Bob won the camera contest with this picture.
4. Don Isted heating a retort in the Experimental Laboratory.
5. Julius Heinemeier filling drums of sand-blasting apparatus.
6. Eugene Sehnert repairing electric welding machine.

Shep Fields Entertains Shell Club at Meadowbrook

The annual Shell Club dinner dance at the Meadowbrook Country Club on August 9th, was a success despite Jupiter Pluvius' attempt to dampen it.

A slight drizzle prevented dancing on the terrace during the early part of the evening. Nature finally relented, however, and the floor was cleared for the rug-cutting swing-cats of the Shell Club. The music of Shep Fields and his famous ripplin' rhythm band kept the floor jammed with jitter-bugging guests. All in all, the affair kept up to the good reputation of the annual dinner dances.

Shell Club Holds Barbecue Picnic

The Shell Club held a barbecue at Indian Creek last Saturday that was absolutely tops in culinary goodies. The tables actually groaned with the weight of the toasted pig sides and frosty cans of — tea. A treasure hunt resulted in some large financial gains for several present. The usual hi-lo clan gathered and made the welkin ring with their remonstrances. This was the first barbecue for the Shell Club. From the number of satisfied customers the chances are another will be planned for next year.

Shell Officials Visit Refinery

The refinery was honored recently by Mr. Alexander Fraser, President of Shell Oil Co., Inc., and Mr. F. A. C. Guepin, who visited the refinery.

Another distinguished gathering occurred when Mr. E. D. Cummings, vice president, visited the refinery with an entourage of local plant managers, newspaper men and officials. In spite of a torrential downpour, the visitors obtained a good idea of petroleum refining.

We wondered how it happened:

Father—Who broke that chair in the parlor last evening?

Daughter—It just collapsed, all of a sudden, father, but neither of us were hurt.

LUBE C. & S. J. O. CLARK

Arthur Dabbs stopped on his way to the Fair long enough to buy an interest in one of the main streets of Palmyra. This makes about four towns that "Fat" has bought an interest in. We have a receipt as proof that a Ford V-8 will run.

"Cap" Pierce has deserted the main deck and is now a very busy man in the hold.

Oel Simpson says he wants the hot room air-conditioned because he is used to the great open spaces and plenty of fresh air out on the farm.

There was a reward posted on the bulletin board for J. E. Long while he was enjoying his vacation, but for some unknown reason the reward and picture disappeared before Gene returned to work. Better luck next time, boys.

Bill Nicolet is only one out of seven, but he had to take all the blame for posting the news about Dabbs' speed record.

John Melvin and Harry Smith have found a place on the new seniority list where there is plenty of work to keep them busy.

Bill Hassebrock says it won't be long before he will be a home guard. What we want to know is whose home he wants to guard.

EXTRACTION PLANT B. JUN

Congratulations to Mr. and Mrs. Harold Kays. A ten pound baby boy August 18. We don't know whether Kays should buy the gang cigars, or the gang buy him cigars.

How did our recent vacationists spend their time? McNely studied figures and curves (and not out of a book) on Florida's sunny beaches. Zeph Lynch visited the home folks at Shipman and pactly all ate them out of house and home. Chet Oetting improved his technique at the old army game. Henry Engleman and Bill Bailey just played men of leisure and stayed home.

FILTER PLANT B. L. TANNER

We break into print after a long absence to congratulate Wilson H. Gross on his marriage to Miss Natalie C. Freese, of Roxana, on Wednesday, August 14. It is reliably reported that several gasoline service stations in the vicinity of Alhambra are facing bankruptcy because of this event.

Here we are, just in the middle of the vacation season and some tall stories are filtering back that will be hard to beat. Carl Fletcher reported that the fish up in Minnesota still had on their "long handles" the last week in June. Brock Yarnell bought a new car in which to drive back to Old Mizzou and reports needing a tow car at each stop sign to cross the intersection. Anyone having a Ford to trade might work up a deal with Brock. Harry Smith plans to motor to the New York Fair and to points East the latter part of August. The Atlantic City Boardwalk will be among the places he will visit for a special reason. Why? Ask Harry.

THE GRAPEVINE

We understand that some excitement was caused recently on Worden Avenue in Alton. The local fire department went galloping over to a residence from which a heavy black smudge was emanating. Investigation revealed, however, that it was only Dick Roberts preparing to feed all of the local feminine dental assistants with barbecued ribs.

The Industrial Relations Department is boasting about their very efficient Lost and Found Department. One of their recent triumphs was in locating a set of false teeth which an employee had lost in the plant. They even had them soaking in a glass of water when the owner came in to claim them. He was so delighted that he almost insisted on planting a couple of moist kisses on the young lady's brow.

The gatemen at the Main Gate have stood at attention so much lately that when "Beanie" Wightman drove into the refinery with a freshly cleaned car the other day, there was a noticeable clicking of heels at the Main Gate.

Did anyone notice how Mr. Roberts was "playing the ponies" at the picnic?

The members of the Cracking Department displayed rare presence of mind at the bingo stand at the picnic Saturday when the deluge struck the tarpaulins. Said tarpaulins sagged with the weight of the water and a few master minds conceived the idea of slashing strategic slits in the tarpaulins to relieve the weight of the water. The hog-wallow which resulted caused some scathing remarks from some of the more conservative members of the crew. Someone said stag parties are the forte of the Cracking Department, rather than bingo stands.

While we're on the subject, someone placed the hot dogs as far away from the soda stand as possible so that by the time you walked from one stand to the other you would build up such an appetite for the commodity that you had just left that you were constantly beating a trail from one to the other.

Bill Krupski, of the Cost Department, had a picnic of his own on August 17th. With Miss Ruth Kreider, of Collinsville, he took the marital vows.

One of the boys at the warehouse is looking for a pair of binoculars after a trip to the Three Mile House the other night. We don't know what kind of a game he was playing, but he sure had his eyes on a girl hiding under a table from her boy friend. We wouldn't mention his name, but he drives a new red Chrysler Windsor.

Russell Gilman became the proud father of a baby girl on August 12th. Russ claims "she's got Hedy LaMarr beat on looks already."

"Dickie" Roberts must really be in the dog house. Recently, when he opened up his lunch he found dog biscuits for dessert.

By golly, these stenos must mean business, this being leap year and all. Probably a half dozen have up and got married this year. Some of the remaining ones must be getting desperate. We were passing the telephone switchboard the other day, when the operator was heard calling the Fuller Brush Company.

Frank Harris acquired another addition to his family on August 21st in the form of a baby girl. Frank was in such a hurry to get to the hospital that the "law" picked him up in East Alton for setting a new course record.

A late flash reports that Ted Walker is pricing furniture. Ted just blushes sheepishly when questioned concerning it. What's the dope?

SHELL OILERS SHUT OUT NEW ATHENS IN EAST ST. LOUIS TOURNAMENT

RED ZUMWALT PITCHES NO-HIT, NO-RUN GAME

In their first game of the Southern Illinois District Tournament on August 20th, at East Side Park, the Shell Refinery Soft Ball team won their first game in the elimination tournament, defeating a strong team from New Athens, Illinois, by the score of 3 to 0.

"Red" Zumwalt, pitching for Shell, was in great form, facing only 25 men. He struck out 17 batsmen and walked four. Spellman, who pitched for New Athens, allowed the Shell men only 3 hits and walked one man.

The game developed into a pitchers' battle and with the score deadlocked at nothing to nothing, Ben Moore opened the fourth inning with a home run drive to left field, putting Shell out in front, 1 to 0. The Oilers scored two more runs in the sixth inning on a single by Butkovich, an error, and a long sacrifice fly to deep center field by Moore, which scored Butkovich from second base.

The box score:—

SHELL	ab	h	r	Eckelkamp, 2b		3	0	0
Butkovich, 2b	3	1	1	E. Snyder, c		3	0	0
B. Moore, cf	3	1	1	Spellman, p		2	0	0
Sadich, 3b	3	0	0	W. Snyder, 3b		2	0	0
Biscan, rf	2	0	0	Rico, cf		0	0	0
Ufert, ss	2	0	0	Deekhaus, sf		2	0	0

TENNIS

Shell teams finished second and third, respectively, in the 1940 YMCA Industrial Tennis League. Super Shell, piloted by W. C. Root, captured second place from H. A. Lewis' Golden Shell team by defeating it twice during the season; the Supers lost only to the League champions, Onized team. In the last match of the season, Golden Shell scored an upset by handing the Onized players their first and only set-back of the season.

Final standings of the teams are:

	W	L
Onized	5	1
Super Shell	3	2
Golden Shell	3	3
Laclede	0	5

Entry lists have been completed for the third annual refinery tennis tournament and play will commence as soon as pairings have been made. Defending champion Root is expected to have a battle on his hands to retain his number one position; it is rumored that a prize has been set for his scalp. Holtman and Yust, Engine Researchers and defending doubles champions, will also find a rocky road ahead and all indications point to an exciting and interesting tournament.

If you would enjoy an eerie venture into the past, Emory Caler and Vernon Meenen suggest a trip through the ancient pyramids in Old Mexico. They were shown through one of these temples in the process of excavation during their recent sojourn in this neighboring siesta-land. However, Emory voiced his disappointment in the modern city of Monterey. Said he, "Even the Indians wear clothes in Monterey. It's too civilized."

Conversation overheard:

First Party: "Where is Nutwood?"

Second Party: "Nutwood?"

First Party: "Yeah, Nutwood, Illinois."

Second Party: "That is a small place west of Jerseyville. Why?"

First Party: "Tom Close was week-ending there a couple of weeks ago, and was teasing some maidens by threatening them with tobacco-laden salivary spray. Before the evening was over, the tables were turned and Tom was deprived of his pants piecemeal fashion. Luckily he managed to borrow a pair of trousers to return to Alton."

Comment: Nice place to play, this Nutwood.

Concern over fifth columnists in our midst is most annoying to Bill O'Hair, who thinks that any columnist is a buzzard. On one occasion, Bill was asked if HE was a fifth columnist. After recovering his composure he shot a questioning glance at his inquirer, who queried, "Isn't that a parachute on your stomach?"

Colorful, gaudy postcards have poured into the Pipe Shop from Dick Roberts, who is on vacation somewhere. Among the recipients of these lovely missives were "Red" Patton, Bill Mitchell, "Notre Dame"

SOFT BALL LEAGUE

Play-off began this week in the refinery Soft Ball Leagues. The top places in the Not-So-Good League were captured by the Research, Service, Office, and Cracking Departments. In the Championship League, the Laboratory, Lube, Labor, and Topping-Dispatching Departments lead the way. Preliminary games are now being played.

To clear up a confusing condition the Shell Employees Recreation Association has issued new membership cards to all paid-up members. If you have paid your dues and have not received your new card, please check with your unit secretary or representative so that the records may be cleared up.

Membership dues for the S.E.R.A. are always acceptable at the Industrial Relations Department. See Mr. Lofy or Mr. Kleinert.

GOLF TOURNAMENT

A golf tournament for members of the Employees' Recreation Association has been announced by the Committee, with qualifying rounds to be played not later than September 2nd (Labor Day). In order to qualify, each entrant must play 18 holes at the Muny Course and have course attendant initial score card when purchasing playing permit. Also, the round must be played with one or more players who must attest qualifying score. A prize will be given to low medalist.

Tournament play will begin about September 8, with a championship flight and as many others as necessary to match all entrants. A trophy will be awarded to the refinery champion, and medals for the winners of the other flights.

HORSESHOE TOURNAMENT

As we go to press, Cannon, Lilley, Towell, and McMeen are leading in the horseshoe singles tournament and will play their next match in the semi-finals. In the doubles, Davidson and Bast have overcome all opponents in the lower bracket, and are now waiting for the final play-off. In the upper bracket, Schillinger and Cannon are slated to meet Grieves and Walker; Harvick and Cunningham to play Grover and Newnom.

BADMINTON TOURNEY STARTS SEPTEMBER 4

Play will start September 4th in the badminton tournament. The schedule will be drawn up then and the play-offs will start immediately.

Entries will be accepted up to August 30th, for this tournament, at the Industrial Relations Department.

Honchak and Peterson Low in Picnic Golf Play

Low medal honor in the picnic golf matches was shared by Peterson, engineering, and Honchak, cracking, with a sparkling 78. Honchak won low putts with 29, while Peterson came in with 12 pars. Boucher, T. V. P., and Jenkins, cleanout, shared blind bogey prize with a 97 less 29 stroke handicap. Sutton, T. V. P., won a blind prize with eight strokes on No. 5 hole; York, dispatching, earned a prize as he slammed around the course for 125 strokes. A total of 45 employees participated in the contest.

But all is not lost to the Engineering Department! Art Peterson disclaimed that by capturing the prize for most pars and sharing low medal honors at the plant picnic golf tourney.

Our many, many other golfers promise keen competition in the forthcoming plant golf tournament.

SHELL NIGHT ON THE S. S. ADMIRAL

FRIDAY AUGUST 30TH
